**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 2, and 12-22, drawn to telecommunication device and method having a transmitter and receiver at the same station comprising radio telephone detail having base station details, classified in class 455, subclass 561.
  - II. Claims 3-10, drawn to a telecommunication system having a transmitter and receiver at separate stations comprising plural transmitters and the receivers having noise, distortion, or singing reduction comprising power control , classified in class 455, subclass 522.
2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not claim the particulars structures or steps of the base station in order to be a telecommunication system having a transmitter and receiver at separate stations comprising plural transmitters and the receivers having noise, distortion, or singing reduction comprising power control. The subcombination has separate utility such as base station.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

***Priority***

8. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Specification***

9. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

***Conclusion***

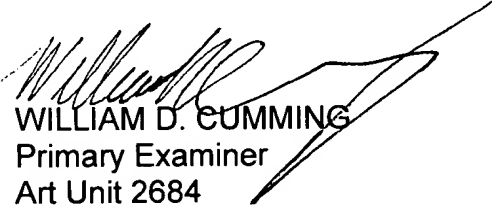

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to WILLIAM D. CUMMING whose telephone number is 703-305-4394. The examiner can normally be reached on Monday, Wednesday-Friday 11:30am to 7:30pm, and Tuesday 10:00am to 5:00pm, EDT.
